

Marselinny Mawuntu, A.S., B.S. Marselinny Mawuntu received her A.S. degree in Allied Health Nutrition and Dietetics and her B.S. degree in Biology Research at Southern Adventist University, Collegedale, TN in the United States. She has worked as an Anatomy and Physiology teaching assistant and grader, which strengthened and solidified her passion for science and laboratory research. Through her internship with FFC, she has created teaching material through powerpoints used in classes taught by the organization's many textbooks as well as established online courses for the different topics of chronic diseases, such as diabetes, CVD, cancer, etc. She was able to edit research articles and create a review journal article in the process. Some of her past experiences include her nomination to attend the National Youth Leadership Forum on Medicine, internships with the Feinstein Institute of Medical Research and the National Multiple Sclerosis Society, and her poster

presentation at FFC's annual international conference at Harvard Medical School. Marselinny is an official member of the Academic Society of Functional Foods and Bioactive Compounds as well as a Certified Functional Food Scientist. Currently, she is in the process of pursuing her M.S. degree, while expanding her research interests and working as a Clinical Information Manager at a hospital in NJ.
